

DATE: July 28, 2000

TO: All Local Health Departments
Attn.: Health Officer/Director of Environmental Health/Chief Sanitarian

FROM: Rodger L. Griffith, R.S.
Regional Food Service Specialist
Food Service Sanitation Section
Food and Dairy Division

SUBJECT: Inspection Form

The inspection form that you are to use when you begin making inspections based on the new Michigan Food Law of 2000/1999 Food Code is enclosed. Please notice that the 44 items, along with the references to the old law and code, have been eliminated, therefore, all of the other informational items remain intact and unchanged.

This new inspection form contains all of the changes as requested by your input. This input was gathered by questionnaire about one and a half years ago by a committee which then incorporated them into the report form you are presently familiar with and using.

Another committee is currently working on standardization of text language that will be designed to be easily adopted into your computer inspection report programs. In addition, this department may adopt a risk based inspection program within the next few years. This may require even further changes.

As always, this department is interested in your ideas and thoughts, and your written comments are welcome.
